Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

My long-term career goal is to develop tools that use systems-wide data and models to identify and promote main players that lead to a desired cellular status. To reach this goal, I use models and latest **Systems Biology's technologies to better integrate data and understand cellular mechanisms** behind diseases or that enable desired biotechnological goals.

I have a BSc in Biology and an MSc in Cell Biology by the Universitat de València, Spain, and I have always been interested in using mathematical approaches to solve biology problems. That is why, for my PhD at the Universitat Politècnica de València, I merged computer models, optimisation techniques and cell biology. **I built a genome-scale model of a cyanobacteria that could be simulated under four drastically different growth conditions. This model allowed me to propose several interventions for the optimised photon-fuelled production of metabolites with industrial significance such as ethanol and hydrogen.** Additionally, this model guided the development of genetic engineering tools by collaborators and helped focus their goals and efforts. This research allowed me to undergo stays at top-ranking scientific research centres such as Uppsala University in Sweden, Denmark Technical University in Denmark and EMBL Heidelberg - The European Molecular Biology Laboratory in Germany.

After my PhD defence, I moved to Institut Curie in Paris, France, to work on systems-wide data integration and Boolean models of cancer in projects in breast, medulloblastoma and prostate. I worked on the development, streamlining and free dissemination of models and tools. Some notable contributions have been **PhysiBoSS, a multi-scale modelling framework with agents with integrated Boolean models** and **PROFILE, a tool to have patient-specific Boolean models that allowed for tailored simulations**. Currently, I am extending the data-tailored models to simulate drug-like inhibition in prostate-patient-specific Boolean models, opening the way to in silico tests of patient-specific drug treatments.

The essence of my research is to choose projects that have a high impact in society, to gather active collaborations to achieve greater goals and to have unconditional scientific transparency by facilitating its reproducibility with open source and open access.

Working with and mentoring students has always been natural to me. In these years, **I have mentored 9 students, including 7 MSc students and 2 PhD student**s, co-writing grants and securing funding for the 2 PhD students. Additionally, and adding to my versatile profile, **I organised from 2007 to 2011 an interdisciplinary group of students from physics, engineering and biology in a synthetic biology competition hosted by the MIT** called iGEM.

Throughout my career, I have been a passionate collaborator across disciplines, working with computer scientists, biologists, physicists and engineers. I have extensive experience in initiating and nurturing fruitful collaborations leading to EU-, Spanish- and French-funded projects that I have written and organised. **I have been the acting coordinator of my group's contribution to an H2020 project** taking care of work packages' tasks as well

as scientific and financial management. I have forged strong links with leading scientists in the Systems Biology community that will be of high value for my perspectives as a junior PI.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

I am a researcher with experience in Systems Biology, Data integration, Data deconvolution, Metabolic Engineering, High-performance computing and Boolean, Metabolic and Multi-scale modelling. I am an enthusiastic collaborator who has promoted collaborations with researchers with varied backgrounds and different fields of expertise, secured funding for international pioneering projects and keenly mentored several MSc and PhD students.

My research efforts have led to:

- **31 publications**, H-index of 11, total number of **citations: 505** (Google scholar, 4 January 2020):
  - **25 peer-reviewed publications, 5 of them as first author**, 13 in Q1 journals,
  - **3 educational publications**,
  - **2 books and 1 book chapter**, 2 of them as first author.
- **37 participations in international conferences**: 3 of them as selected talks and 34 as poster contributions.
- **13 participations in R&D projects**: I **co-organised and wrote 6 EU-, Spanish- and French-funded collaborative projects** and I was the **acting PI of my group's contribution to a H2020 project**, due to a maternity leave.
- **Co-organiser of the 2nd Systems biology of Transcription Regulation Workshop** at ICSB'18 in Lyon, France.
- **Reviewer for 6 Q1 journals** including Bioinformatics, BMC Systems Biology, PLoS ONE, Scientific Reports, Frontiers in Physiology, F1000 Research.
- **4 stays at top-ranking scientific research centres, 4 grants and scholarships, 3 prizes for scientific accomplishments**.

My teaching and mentoring experience can be proven by the following indicators:

- **2 PhD thesis supervised, 2 MSc theses supervised** and 5 more MSc students mentored, and 1 Bachelor thesis supervised.
- **5 international courses** taught at universities and research centres and 7 invited seminars at universities and research centres.
- **Organisation of an interdisciplinary group of students at the annual international iGEM Synthetic Biology competition hosted by MIT from 2007 to 2011**.

Arnau Montagud Aquino

Current professional situation

Employing entity: Centro Nacional de Supercomputación **Type of entity:** R&D Centre

Department: Life Sciences, Barcelona Supercomputing Center

Professional category: Postdoc **Educational Management (Yes/No):** No

City employing entity: Barcelona, Catalonia, Spain

Email: arnau.montagud@bsc.es

Start date: 01/01/2019

Type of contract: Temporary employment contract **Dedication regime:** Full time

Primary (UNESCO code): 240700 - Cell biology; 249900 - Other biological specialities

Secondary (UNESCO code): 240900 - Genetics; 241000 - Human biology

Tertiary (UNESCO code): 120311 - Computer software

Performed tasks: I am currently working in having personalised real-sized tumour simulations in projects focused on the scaling up of simulations and online monitoring using High-performance computation and on the simulation of paediatric cancers. Additionally, one of my goals at BSC is to ease the migration of Systems Biology tools to world-leading high-performance computing platforms, such as MareNostrum4. Thus, I am incorporating the latest parallelisation and optimisation techniques to modelling tools and focusing these in biological problems that need the use of massive parallel platforms such as the simulations of real-sized tumours. These works are the basis of several competitive calls for funding that I have prepared, personal and consortium-based. Additionally, I am mentoring 2 MSc students.

Identify key words: Cell biology; Molecular biology; Computational biology; Genetics
Applicability in teaching and/or research: The research that I am performing at BSC with my colleagues is in the process of being published in top-ranking journals. Additionally, I am working in bringing together two very different fields, such as high-performance computing and Life Sciences, so that the latest research in machine learning, data deconvolution and modelling can be migrated with little efforts to platforms were it can address high-impact questions.

Previous positions and activities

	Employing entity	Professional category	Start date
1	Institut Curie	Postdoc	13/01/2014
2	Universidad Politécnica de Valencia	Postdoc	01/06/2012
3	Universidad Politécnica de Valencia	Estudiante predoc	01/04/2007

1 **Employing entity:** Institut Curie **Type of entity:** Public Research Body
Department: U900 - Systems Biology of Cancer
City employing entity: Paris, Île de France, France
Professional category: Postdoc **Educational Management (Yes/No):** No
Start-End date: 13/01/2014 - 31/12/2018 **Duration:** 4 years - 11 months - 19 days
Type of contract: Temporary employment contract
Dedication regime: Full time
Primary (UNESCO code): 240700 - Cell biology; 249900 - Other biological specialities
Secondary (UNESCO code): 240900 - Genetics; 320713 - Oncology
Tertiary (UNESCO code): 110208 - Mathematical logic; 120311 - Computer software
Performed tasks: I have been involved in projects with three different types of cancer: breast, medulloblastoma and prostate cancer. I have studied theses using four different approaches: I used data deconvolution to discover new relevant signatures; I used pathway enrichment tools to better describe and group patients; I built Boolean models, published pipelines and tools to better capture patients' diversity and drug predictions; and I co-authored a multiscale modelling framework that combines agent-based and Boolean modelling.
Applicability in teaching and/or research: Research performed in this position opened new avenues on how to adress and incorporate signalling pathways modelling with interactions between cells and their surrounding environment. To perform this, I collaborated with colleagues from US, France, UK and Germany in projects I co-wrote with them in funding calls from the EU and France. This position also allowed me to connect with new communities such as the agent-based and Boolean modelling ones, and havin active collaborations with clinicians and medical practicioners. Additionally, I continued my teaching efforts with international seminars and courses on Systems Biology.

2 **Employing entity:** Universidad Politécnica de Valencia **Type of entity:** University
Department: Instituto Universitario de Matemática Pura y Aplicada
City employing entity: Valencia, Valencian Community, Spain
Professional category: Postdoc **Educational Management (Yes/No):** No
Start-End date: 01/06/2012 - 10/01/2014
Type of contract: Temporary employment contract
Dedication regime: Full time
Primary (UNESCO code): 241403 - Bacterial metabolism
Secondary (UNESCO code): 230212 - Fermentation; 240701 - Cell culture
Tertiary (UNESCO code): 120709 - Linear programming

Performed tasks: I worked on the use of multi-objective optimizations on flux balance analysis and on models of the scaling up of the production of hydrogen in Synechocystis sp. PCC6803. I mentored 5 MSc and 2 PhD students.

Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings

Applicability in teaching and/or research: In this position I finished several topics from my PhD project. Specifically, I helped secure the project funding by co-writing an EU-funded project (CyanoFactory) that took the metabolic models to the chemostat, shifting the focus of the project to a more engineering one. In this period, I continued with the mentoring of MSc and PhD students that expanded my research in other cyanobacteria and continued developing tools for metabolic modelling.

3 **Employing entity:** Universidad Politécnica de Valencia **Type of entity:** University

Department: Instituto Universitario de Matemática Pura y Aplicada

City employing entity: Valencia, Valencian Community, Spain

Professional category: Estudiante predoc **Educational Management (Yes/No):** No

Start-End date: 01/04/2007 - 01/06/2012

Type of contract: Grant-assisted student (pre or post-doctoral, others)

Dedication regime: Full time

Primary (UNESCO code): 241403 - Bacterial metabolism

Secondary (UNESCO code): 230212 - Fermentation; 240701 - Cell culture

Tertiary (UNESCO code): 120709 - Linear programming

Performed tasks: I built the first genome-scale metabolic model of Synechocystis sp. PCC6803 and I used flux balance analysis to simulate for the first time a single metabolic network under different growth conditions, with completely different flux landscapes. I also proposed several mutants that would enhance the cyanobacterium's potentialities as a production platform. Lastly, I studied the transcriptomics of metabolic changes upon light regime changes.

Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings

Applicability in teaching and/or research: Tasks performed in this position allowed me to publish my first first-author papers, attend several conferences and connecting with the vibrant communities of System Biology and Metabolic Engineering. The knowledge and abilities gathered in this position enabled me to help my supervisors and colleagues in starting managing budgets, grant applications and students and tasks otherwise meant for senior researchers. In terms of teaching, I helped design and build the syllabus of a course on Synthetic Biology, Systems Biology and Metabolic Engineering that we taught at the "Centro de Formación Permanente" of the Universitat Politècnica de València for 4 years. This syllabus was then continued by collaborators as a course in the Bioinformatic Master school of the Universitat Politècnica de València. Notably, I was the main driver of my group's contribution to the international Synthetic Biology competition from 2007 to 2011.

Education

University education

1st and 2nd cycle studies and pre-Bologna degrees

University degree: Higher degree
Name of qualification: Licenciado en Biología (BSc in Biology)
City degree awarding entity: Valencia, Valencian Community, Spain
Degree awarding entity: Universitat de València **Type of entity:** University
Date of qualification: 24/07/2006
Average mark: Excellent

Doctorates

Doctorate programme: Doctor en Programa Oficial de Posgrado en Matemáticas (PhD)
Degree awarding entity: Universidad Politécnica de Valencia **Type of entity:** University
City degree awarding entity: Valencia, Valencian Community, Spain
Date of degree: 26/06/2012
DEA awarding entity: Universitat de València
Date DEA was awarded: 19/02/2008
European doctorate: Yes **Date of certificate:** 17/04/2012
Thesis title: Modelling and analysis of biological systems to obtain biofuels
Thesis director: Javier Fermín Urchueguía
Thesis co-director: Pedro Fernández de Córdoba; Kiran R Patil
Obtained qualification: Cum Laude, Mención Internacional, Premio extraordinario de tesis doctoral
Recognition of quality: Yes
Special doctorate award: Yes **Date of award:** 26/05/2013

Other postgraduate university studies

Type of education: Masters
Postgraduate qualification: Máster Universitario en Biología Molecular, Celular y Genética (MSc)
City degree awarding entity: Valencia, Valencian Community, Spain
Degree awarding entity: Universitat de València **Type of entity:** University
Faculty, institute or centre: Facultad de Ciencias Biológicas
Date of qualification: 19/02/2008
Obtained qualification: 7.3 / 10

Teaching experience

General teaching experience

1 **Type of teaching:** International teaching
Name of the course: Biología de sistemas computacional
Type of programme: Master's degree **Type of teaching:** In person theory
Type of subject: Obligatory
University degree: Máster Universitario en Bioinformática
Course given: 2
Start date: 10/12/2019 **End date:** 10/12/2019
End date: 10/12/2019 **Type of hours/ ECTS credits:** Hours
Hours/ECTS credits: 4
Entity: Universitat de València **Type of entity:** University
Faculty, institute or centre: Escuela Técnica Superior de Ingeniería de la Universidad de Valencia (ETSE-UV)
City of entity: Valencia, Valencian Community, Spain
Subject language: Spanish

2 **Type of teaching:** Unofficial teaching
Name of the course: Introducción a la Biología Sintética
Type of subject: Modular
University degree: Cursos de Formación Permanente
End date: 09/05/2011 **Type of hours/ ECTS credits:** Hours
Hours/ECTS credits: 35
Entity: Universidad Católica de Valencia San Vicente Mártir **Type of entity:** University
Faculty, institute or centre: Facultad de Ciencias - Universidad Católica de Valencia
City of entity: Valencia, Valencian Community, Spain
Subject language: English

3 **Type of teaching:** Unofficial teaching
Name of the course: Introducción a la Biología Sintética
Type of subject: Modular
University degree: Cursos de Formación Permanente
End date: 19/04/2010 **Type of hours/ ECTS credits:** Hours
Hours/ECTS credits: 35
Entity: Universidad Politécnica de Valencia **Type of entity:** University
Faculty, institute or centre: Centro de Formación Permanente

City of entity: Valencia, Valencian Community, Spain
Subject language: English

4 **Type of teaching:** Unofficial teaching
Name of the course: Introducción a la Biología Sintética
Type of subject: Modular
University degree: Cursos de Formación Permanente
End date: 21/04/2009 **Type of hours/ ECTS credits:** Hours
Hours/ECTS credits: 35
Entity: Universidad Politécnica de Valencia **Type of entity:** University
Faculty, institute or centre: Centro de Formación Permanente
City of entity: Valencia, Valencian Community, Spain
Subject language: English

5 **Type of teaching:** Unofficial teaching
Name of the course: Introducción a la Biología Sintética
Type of subject: Modular
University degree: Cursos de Formación Permanente
End date: 07/04/2008 **Type of hours/ ECTS credits:** Hours
Hours/ECTS credits: 35
Entity: Universidad Politécnica de Valencia **Type of entity:** University
Faculty, institute or centre: Centro de Formación Permanente
City of entity: Valencia, Valencian Community, Spain
Subject language: English

Experience supervising doctoral thesis and/or final year projects

1 **Project title:** Multiobjective optimization of cyanobacterial metabolic models
Type of project: Doctoral thesis
Co-director of thesis: Fernández de Córdoba, Pedro J; Reynoso Meza, Gilberto; Montagud Aquino, Arnau
Entity: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: València, Valencian Community, Spain
Student: Maria Siurana Paula
Obtained qualification: Sobresaliente
Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings
Date of reading: 27/09/2017
European doctorate: Yes
Quality recognition: Yes **Date of award:** 27/09/2017

2 **Project title:** Model-based analysis and metabolic design of a cyanobacterium for bio-products synthesis
Type of project: Doctoral thesis
Co-director of thesis: Pedro J. Fernández de Córdoba; Arnau Montagud; Javier F. Urchueguía Schölzel
Entity: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: València, Valencian Community, Spain
Student: Julián Triana Dopico
Obtained qualification: Sobresaliente
Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings
Date of reading: 24/07/2014

European doctorate: No
Quality recognition: Yes **Date of award:** 24/07/2014

3 **Project title:** Reconstrucción de un modelo metabólico para Synechococcus elongatus PCC 7942 y exploración de aplicaciones potenciales
Type of project: Minor thesis
Co-director of thesis: Rafael Diego Maldonado Caro; Arnau Montagud
Entity: Universidad de Alicante **Type of entity:** University
City of entity: Alacant, Valencian Community, Spain
Student: Maria Siurana Paula
Obtained qualification: Sobresaliente
Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings
Date of reading: 13/09/2012
Date of award: 13/09/2012

4 **Project title:** Strategies for the optimisation of hydrogen production in photosynthetic bacteria
Type of project: End of course project
Co-director of thesis: Pedro J. Fernández de Córdoba; Arnau Montagud; Javier F. Urchueguía
Entity: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: València, Valencian Community, Spain
Student: Maria Siurana Paula
Obtained qualification: Sobresaliente
Identify key words: Calculus variations and optimal control: optimization; Applied biology; Genetically modified organisms; Control of biosystems and bioprocessings
Date of reading: 21/12/2011
Date of award: 21/12/2011

Other activities/achievements not included above

1 **Description of the activity:** Organisation of an interdisciplinary group of students at the annual international iGEM Synthetic Biology competition from 2007 to 2011
Identify key words: Communication and information: circuits; Mathematical analysis; Genetically modified organisms; Information technology and adata processing; Electronic circuits; Automatic; Electric engineering
City of activity: Boston, United States of America
Organising entity: Massachusetts Institute of Technology
Type of entity: University
End date: 2011

2 **Description of the activity:** Participation as a student at the iGEM Synthetic Biology competition in 2006
Identify key words: Communication and information: circuits; Mathematical analysis; Genetically modified organisms; Information technology and adata processing; Electronic circuits; Automatic; Electric engineering
City of activity: Boston, United States of America
Organising entity: Massachusetts Institute of Technology
Type of entity: University
End date: 2006

Scientific and technological experience

Research and development groups/teams

1 **Name of the group:** Computational Biology
Aims of the group: Study of Computational Biology
Name of principal investigator: Alfonso Valencia
Type of collaboration: Co-authorship of publications
City of group: Barcelona, Catalonia, Spain
Affiliation entity: Centro Nacional de Supercomputación
Type of entity: R&D Centre
Start date: 01/01/2019
Duration: 1 year

2 **Name of the group:** Computational Systems Biology of Cancer
Aims of the group: Study of Systems Biology of Cancer
Name of principal investigator: Emmanuel Barillot
Standardised code: U900
Type of collaboration: Co-authorship of publications
City of group: Paris, France
Affiliation entity: Institut Curie
Type of entity: Public Research Body
Start date: 13/01/2014
Duration: 5 years

3 **Name of the group:** Architecture and regulation of metabolic networks
Aims of the group: Study of Systems Biology of Bacteria
Name of principal investigator: Kiran Raosaheb Patil
Type of collaboration: Co-authorship of publications
City of group: Heidelberg, Germany
Affiliation entity: EMBL Heidelberg
Type of entity: Public Research Body

Start date: 01/09/2010 **Duration:** 5 months

4 **Name of the group:** Architecture and regulation of metabolic networks
Aims of the group: Study of Systems Biology of Bacteria
Name of principal investigator: Kiran Raosaheb Patil
Type of collaboration: Co-authorship of publications
City of group: Kongens Lyngby, Denmark
Affiliation entity: Technical University of Denmark **Type of entity:** University
Start date: 01/09/2008 **Duration:** 10 months

5 **Name of the group:** InterTech
Aims of the group: Study of Systems Biology of Cyanobacteria and Synthetic Biology
Name of principal investigator: Javier F Urchueguía
Type of collaboration: Co-authorship of publications
City of group: Valencia, Valencian Community, Spain
Affiliation entity: Universidad Politécnica de Valencia **Type of entity:** University
Start date: 01/04/2007 **Duration:** 6 years - 8 months

Scientific or technological activities

R&D projects funded through competitive calls of public or private entities

1 **Name of the project:** EPIC
Entity where project took place: Centro Nacional de Supercomputación **Type of entity:** R&D Centre
City of entity: Barcelona, Catalonia, Spain
Name principal investigator (PI, Co-PI....): Alfonso Valencia
Funding entity or bodies:
Ministerio de Ciencia e Innovación **Type of entity:** Ministry
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 01/01/2019 - 01/01/2022

2 **Name of the project:** INFORE
Entity where project took place: Centro Nacional de Supercomputación **Type of entity:** R&D Centre
City of entity: Barcelona, Catalonia, Spain
Name principal investigator (PI, Co-PI....): Antonis Deligiannakis
Funding entity or bodies:
Comisión Europea **Type of entity:** UE
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 01/01/2019 - 01/01/2022

3 **Name of the project:** iPC
Entity where project took place: Centro Nacional de Supercomputación **Type of entity:** R&D Centre
City of entity: Barcelona, Catalonia, Spain
Name principal investigator (PI, Co-PI....): Julio Sáez-Rodríguez
Funding entity or bodies:

Comisión Europea **Type of entity:** UE
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 01/01/2019 - 01/01/2022

4 **Name of the project:** Personalized Engine for Cancer Integrative Study and Evaluation (PrECISE)
Entity where project took place: Institut Curie **Type of entity:** Public Research Body
City of entity: Paris, Île de France, France
Name principal investigator (PI, Co-PI....): Julio Sáez-Rodríguez
Nº of researchers: 30
Funding entity or bodies:
Comisión Europea **Type of entity:** UE
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 01/01/2015 - 31/12/2018
Total amount: 1.500.000 €

5 **Name of the project:** Multi-scale modelling of molecular mechanisms in medulloblastoma (M5)
Entity where project took place: Institut Curie **Type of entity:** Public Research Body
City of entity: Paris, Île de France, France
Name principal investigator (PI, Co-PI....): Olivier Ayrault
Nº of researchers: 8
Funding entity or bodies:
AVIESAN **Type of entity:** State agency
City funding entity: Paris, Île de France, France

Institut National du Cancer (INCa) **Type of entity:** State agency
City funding entity: Paris, Île de France, France

Start-End date: 01/12/2015 - 01/12/2018
Total amount: 600.000 €

6 **Name of the project:** Multiscale mathematical modelling of tumour invasion (INVADE)
Entity where project took place: Institut Curie **Type of entity:** Public Research Body
City of entity: Paris, Île de France, France
Name principal investigator (PI, Co-PI....): Emmanuel Barillot
Nº of researchers: 13
Funding entity or bodies:
ITMO Cancer **Type of entity:** State agency
City funding entity: Paris, Île de France, France

Start-End date: 13/01/2014 - 01/11/2016
Total amount: 677.000 €

7 **Name of the project:** PIONEERS INTO PRACTICE - PIONEER Arnau Montagud
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
Name principal investigator (PI, Co-PI....): Arnau Montagud Aquino
Nº of researchers: 1
Funding entity or bodies:
ASSOCIATION CLIMATE KIC **Type of entity:** CLIMATE KIC
City funding entity: Bruselas, Belgium

Start-End date: 01/04/2013 - 01/01/2014

Total amount: 8.000 €

8 **Name of the project:** Design, construction and demonstration of solar biofuel production using novel (photo)synthetic cell factories (308518)
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Javier Fermín Urchueguía Schölzel
Nº of researchers: 8
Funding entity or bodies:
Comisión Europea **Type of entity:** UE
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 02/04/2013 - 31/12/2013
Total amount: 321.500 €

9 **Name of the project:** INTEGRACION DE BASES DE DATOS BIOLOGICAS CON NUEVAS HERRAMIENTAS DE COMPUTO EN BIOLOGIA SINTETICA ORIENTADAS A LA PRODUCCION DE BIOCOMBUSTIBLES (TIN2009-12359)
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Pedro José Fernández De Córdoba Castellá
Nº of researchers: 4
Funding entity or bodies:
MINISTERIO DE EDUCACION Y CIENCIA
City funding entity: Spain

Start-End date: 01/01/2010 - 01/01/2013
Total amount: 44.044 €

10 **Name of the project:** ACCIONES EDUCATIVAS, DEPORTIVAS, SOCIALES Y SANITARIAS EN LA UNIVERSIDAD DE PINAR DEL RIO (CUBA) (3012/2009)
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Pedro José Fernández De Córdoba Castellá
Nº of researchers: 13
Funding entity or bodies:
Generalitat Valenciana **Type of entity:** GVA
City funding entity: Valencia, Valencian Community, Spain

Start-End date: 15/05/2009 - 15/05/2012
Total amount: 65.000 €

11 **Name of the project:** COMPUTATIONAL ASSISTED MODELLING OF SYNECHOCYSTIS SP PCC6803 GROWTH IN ORDER TO PRODUCE A CHASSIS FOR HYDROGEN PRODUCTION (HP2008-0079)
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Javier Fermín Urchueguía Schölzel
Nº of researchers: 4
Funding entity or bodies:

MINISTERIO DE EDUCACION Y CIENCIA
City funding entity: Spain

Start-End date: 01/01/2009 - 01/01/2011
Total amount: 8.500 €

12 **Name of the project:** BIOMODULARH2: ENGINEERED MODULAR BACTERIAL HYDROGEN PHOTOPRODUCTION OF HYDROGEN (ACOMP/2009/244
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Javier Fermín Urchueguía Schölzel
Nº of researchers: 5
Funding entity or bodies:
Generalitat Valenciana **Type of entity:** GVA
City funding entity: Valencia, Valencian Community, Spain

Start-End date: 15/01/2007 - 15/07/2010
Total amount: 10.000 €

13 **Name of the project:** ENGINEERED MODULAR BACTERIAL HYDROGEN PHOTOPRODUCTION OF HYDROGEN (043340)
Entity where project took place: Universidad Politécnica de Valencia **Type of entity:** University
City of entity: Valencia, Valencian Community, Spain
Name principal investigator (PI, Co-PI....): Pedro José Fernández De Córdoba Castellá; Javier Fermín Urchueguía Schölzel
Nº of researchers: 13
Funding entity or bodies:
Comisión Europea **Type of entity:** UE
City funding entity: Madrid, Community of Madrid, Spain

Start-End date: 15/01/2007 - 15/07/2010
Total amount: 280.325 €

Results

Technological results derived from specialized and transfer activities, not included in previous sections

1 **Description:** Repository of data, code and analyses for the personalization of logical models with multi-omics data
Name of the principal Investigator (PI): Laurence Calzone
Name of the Co-principal investigator (Co-PI): Arnau Montagud
Degree of contribution: Scientific coordinator
Geographical area: European Union
Collaborating entity or bodies:
Institut Curie **Type of entity:** Public Research Body
City collaborating entity: Paris, France

Start date: 28/02/2018 **Duration:** 1 year - 11 months

Relevant results: We present here a novel framework, referred to as PROFILE, to tailor logical models to a particular biological sample such as a patient tumor. This methodology permits to compare the model simulations to individual clinical data, i.e., survival time. Our approach focuses on integrating mutation data, copy number alterations (CNA), and expression data (transcriptomics or proteomics) to logical models. In the present pipeline, two different datasets may be used (METABRIC or TCGA) and processed for further simulations with two different logical models, either a generic or a breast-specific one. Link: https://github.com/sysbio-curie/PROFILE.

2 **Description:** Repository of PhysiBoSS, a C++ software for multiscale simulation of heterogeneous multi-cellular system
Name of the principal Investigator (PI): Laurence Calzone
Name of the Co-principal investigator (Co-PI): Arnau Montagud
Degree of contribution: Researcher
Geographical area: European Union
Collaborating entity or bodies:
Institut Curie **Type of entity:** Public Research Body
City collaborating entity: Paris, France

Start date: 12/11/2017 **Duration:** 2 years - 2 months
Relevant results: PhysiBoSS provides a flexible and computationally efficient framework to explore the effect of environmental and genetic alterations of individual cells at the population level, bridging the critical gap from single-cell genotype to single-cell phenotype and emergent multicellular behaviour. PhysiBoSS is freely available on GitHub (https://github.com/sysbio-curie/PhysiBoSS), with a Docker image (https://hub.docker.com/r/gletort/physiboss/). It is distributed as open source under the BSD 3-clause license.

3 **Description:** Pipeline of computational methods for logical modelling of biological networks that are deregulated in diseases
Name of the principal Investigator (PI): Laurence Calzone
Name of the Co-principal investigator (Co-PI): Arnau Montagud
Degree of contribution: Scientific coordinator
Geographical area: European Union
Collaborating entity or bodies:
Institut Curie **Type of entity:** Public Research Body
City collaborating entity: Paris, France

Start date: 08/04/2016 **Duration:** 3 years - 9 months
Relevant results: We present a complete pipeline of computational tools that performs a series of analyses to explore a logical model's properties. A step-by-step tutorial is provided as a Supplementary Material and all models, tools and scripts are provided on an accompanying website: https://github.com/sysbio-curie/Logical_modelling_pipeline.

18 **Title of the work:** Diseño de bases de datos biológicas, un paso hacia la automatización del proceso de construcción de modelos a escala genómica
Name of the conference: XV Convencion Cientifica de Ingenieria y Arquitectura
Type of participation: 'Participatory - poster
City of event: La Habana, Cuba
Date of event: 03/12/2010
R. Reyes; R. A. Jaime; J. Garrido; J. Triana; V. Cordova; L. Villar; F. Marquez; J. C. Castro; E. Navarro; A. Montagud; P. Fernández de Córdoba; J.F. Urchueguía; J. Martínez. ISBN 978-959-261-317-1

19 **Title of the work:** Modelo metabólico de una cianobacteria, una fuente de energía a partir de luz
Name of the conference: XV Convencion Cientifica de Ingenieria y Arquitectura
Type of participation: 'Participatory - poster

City of event: La Habana, Cuba
Date of event: 03/12/2010
J. Triana; V. Cordova; R. A. Jaime; R. Reyes; J. Garrido; L. Villar; F. Marquez; J. C. Castro; E. Navarro; A. Montagud; P. Fernández de Córdoba; J.F. Urchueguía. ISBN 978-959-261-317-1

20 **Title of the work:** Rational Organism Network Painter: una herramienta optimizada de visualización de redes metabólicas de fácil uso
Name of the conference: XV Convencion Cientifica de Ingenieria y Arquitectura
Type of participation: 'Participatory - poster
City of event: La Habana, Cuba
Date of event: 03/12/2010
J. Garrido; J. Triana; V. Cordova; R. A. Jaime; R. Reyes; L. Villar; J. C. Castro; E. Navarro; A. Montagud; P. Fernández de Córdoba; J.F. Urchueguía. ISBN 978-959-261-317-1

21 **Title of the work:** Genome-scale metabolic model of Synechocystis sp. PCC6803
Name of the conference: Industrial Systems Biology conference
Type of participation: 'Participatory - poster
Corresponding author: Yes
City of event: Goteborg, Sweden
Date of event: 18/08/2010
End date: 20/08/2010
A. Montagud; E. Navarro; P. Fernández de Córdoba; J.F. Urchueguía; K. R. Patil.

22 **Title of the work:** Genome-scale metabolic model of Synechocystis sp. PCC6803
Name of the conference: International Hydrogenase conference, H2ase 2010
Type of participation: 'Participatory - poster
Corresponding author: Yes
City of event: Uppsala, Sweden
Date of event: 27/06/2010
End date: 02/07/2010
A. Montagud; E. Navarro; P. Fernández de Córdoba; J.F. Urchueguía; K. R. Patil.

23 **Title of the work:** Energy biotechnology with cyanobacteria
Name of the conference: Marine Biotechnology: Future Challenges conference
Type of participation: 'Participatory - poster
Corresponding author: No
City of event: Acquafredda di Maratea, Italy
Date of event: 20/06/2010
End date: 25/06/2010
E Navarro; A Montagud; R Castañeda; P Fernandez de Cordoba; JF Urchueguia.

24 **Title of the work:** Construction and analysis of a genome scale metabolic model for the cyanobacteria Synechocystis sp. PCC6803
Name of the conference: IX Jornadas de Matemática Aplicada
Type of participation: 'Participatory - poster
Corresponding author: Yes
City of event: Valencia, Spain
Date of event: 09/2009
Organising entity: Universidad Politécnica de Valencia **Type of entity:** University
A. Montagud; E. Navarro; P. Fernández de Córdoba; J.F. Urchueguía; K. R. Patil. ISBN 978-84-8363-512-4

25 **Title of the work:** Dynamical analysis of a biological promoter calibrator
Name of the conference: IX Jornadas de Matemática Aplicada
Type of participation: 'Participatory - poster
City of event: Valencia, Spain
Date of event: 09/2009
Organising entity: Universidad Politécnica de Valencia **Type of entity:** University
E. Navarro; A. Montagud; F. R. Villatoro; P. Fernández de Córdoba; J.F. Urchueguía. ISBN 978-84-8363-512-4

26 **Title of the work:** Construction and analysis of a genome scale metabolic model for the cyanobacteria Synechocystis sp. PCC6803
Name of the conference: European Conference on Synthetic Biology II (ECSB II)
Type of participation: 'Participatory - poster
Corresponding author: Yes
City of event: Sant Feliu de Guíxols, Catalonia, Spain
Date of event: 03/2009
A. Montagud; E. Navarro; P. Fernández de Córdoba; J.F. Urchueguía; K. R. Patil.

27 **Title of the work:** Yeast cultures with UCP-1 uncoupling activity as a heating device
Name of the conference: IET BioSysBio 2009 Conference
Type of participation: 'Participatory - poster
Corresponding author: No
City of event: Cambridge, United Kingdom
Date of event: 03/2009
J. Delás; M. Notari; J. Forés; J. Pechuan; M. Porcar; E. Navarro; A. Montagud; M. Báguena; J. Peretó; P. Fernández-de-Córdoba; E. Rial; A. Moya; J.F. Urchueguía.

28 **Title of the work:** Analysis of the capabilities of an autotrophic chassis oriented to synthetic biology applications.
Name of the conference: Synthetic Biology 4.0 Conference
Type of participation: 'Participatory - poster
Corresponding author: No
City of event: Hong Kong, China
Date of event: 10/2008
E. Navarro; A. Montagud; P. Fernandez de Cordoba; J.F. Urchueguia.

29 **Title of the work:** Promoter calibrator: one possible application for a biological comparator
Name of the conference: Synthetic Biology 4.0 Conference
Type of participation: 'Participatory - poster
Corresponding author: Yes
City of event: Hong Kong, China
Date of event: 10/2008
A. Montagud; E. Navarro; P. Aparicio; O. Cuenca; D. Das; J. Garzón; S. K. Maiti; H. Mosquera; R. Soriano; M. Báguena; P. Fernández-de-Córdoba; A. Ferrando; A. Jaramillo; J. Peretó; J.F. Urchueguía.

30 **Title of the work:** Promoter calibrator: one possible application for a biological comparator
Name of the conference: IET BioSysBio 2008 Conference
Type of participation: 'Participatory - poster
Corresponding author: No

City of event: Londres,
Date of event: 04/2008
P. Aparicio; O. Cuenca; D. Das; J. Garzón; S. K. Maiti; A. Montagud; H. Mosquera; R. Soriano; M. Báguena; E. Navarro; P. Fernández-de-Córdoba; A. Ferrando; A. Jaramillo; J. Peretó; J.F. Urchueguía.

31 **Title of the work:** Cyanobacterial metabolic modelling directed to hydrogen production
Name of the conference: European Conference on Synthetic Biology (ECSB)
Type of participation: 'Participatory - poster
City of event: Sant Feliu de Guíxols, Spain
Date of event: 11/2007
E. Navarro; D. Das; S.K. Maiti; A. Montagud; M. Báguena; P. Fernández de Córdoba; J.F. Urchueguía.

32 **Title of the work:** Promoter calibrator: one possible application for a biological comparator
Name of the conference: European Conference on Synthetic Biology (ECSB)
Type of participation: 'Participatory - poster
City of event: Sant Feliu de Guíxols, Spain
Date of event: 11/2007
A. Montagud; P. Aparicio; O. Cuenca; D. Das; J. Garzón; S. K. Maiti; H. Mosquera; R. Soriano; M. Báguena; E. Navarro; P. Fernández-de-Córdoba; A. Ferrando; A. Jaramillo; J. Peretó; J.F. Urchueguía.

33 **Title of the work:** BioModularH2: Engineered Modular Bacteria Photoproduction of Hydrogen
Name of the conference: VIII Jornadas de Matemática Aplicada
Type of participation: 'Participatory - poster
City of event: Valencia, Spain
Date of event: 09/2007
E. Navarro; D. Das; S.K. Maiti; A. Montagud; M. Báguena; P. Fernández de Córdoba; J.F. Urchueguía. ISBN 978-84-8363-203-1

34 **Title of the work:** Characterisation of parts in cyanobacteria
Name of the conference: 9th Annual Functional Genomics: Synthetic Biology
Type of participation: 'Participatory - poster
City of event: Goteborg, Sweden
Date of event: 08/2007
T. Heidorn; Z. Shen; D. Camsund; A. Montagud; P. Lindblad.

35 **Title of the work:** Cyanobacterial metabolic modelling directed to hydrogen production
Name of the conference: 9th Annual Functional Genomics: Synthetic Biology
Type of participation: 'Participatory - poster
City of event: Goteborg, Sweden
Date of event: 08/2007
E. Navarro; D. Das; S.K. Maiti; A. Montagud; P. Fernández de Córdoba; J.F. Urchueguía.

36 **Title of the work:** Design of a cellular biosensor of vanillin through synthetic biology (iGEM 2006 Valencia project)
Name of the conference: Congreso No Lineal 2007
Type of participation: 'Participatory - poster
City of event: Ciudad Real, Spain
Date of event: 06/2007
E. Navarro; A. Aparici; M.C. Aroca; M. Baguena; J. Carrera; C. Edo; P. Fernandez-de-Cordoba; A. Ferrando; G. Fuertes; D. Gimenez; C. Mata; J.V. Medrano; A. Montagud; C. Navarrete; G. Rodrigo; J. Salgado; P. Tortosa; A. Jaramillo; J. F. Urchueguia.

37 **Title of the work:** iGEM-2006: la respuesta valenciana al reto de la Biología Sintética
Name of the conference: XXIX Congreso de la SEBBM
Type of participation: 'Participatory - poster
City of event: Elche, Spain
Date of event: 09/2006
A. Montagud; A. Aparici; M.C. Aroca; M. Baguena; J. Carrera; C. Edo; P. Fernandez-de-Cordoba; A. Ferrando; G. Fuertes; D. Gimenez; C. Mata; J.V. Medrano; C. Navarrete; E. Navarro; G. Rodrigo; J. Salgado; P. Tortosa; A. Jaramillo; J. F. Urchueguia.

Works submitted to national or international seminars, workshops and/or courses

1 **Title of the work:** Módulo 5. Herramientas en acción
Name of the event: Innovación tecnológica basada en datos aplicada a la salud: a qué retos se enfrentan los profesionales sanitarios
Type of event: Course
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: National
City of event: Barcelona, Catalonia, Spain
Date of event: 30/11/2019
End date: 30/11/2019
Organising entity: Bioinformatics Barcelona Association - Luzán - AMGEN
Type of entity: Associations and Groups
City organizing entity: Barcelona, Catalonia, Spain
Arnau Montagud; Alfonso Valencia.

2 **Title of the work:** Cell-level simulations: from molecules to organoids
Name of the event: BImBS 2019 - BioInformatics meets BioSimulations in protein and DNA studies: from theory to practice
Type of event: Course
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: National
City of event: Lugano, Swaziland
Date of event: 07/10/2019
End date: 08/10/2019
Organising entity: CECAM - CSCS
Type of entity: Public Research Body
City organizing entity: Lugano, Switzerland
Arnau Montagud.

3 **Title of the work:** From genes to pathways: pathway quantification with ROMA
Name of the event: Genopole Summer School: Bioinformatics and biostatistical tools in medical genomics
Type of event: Course
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: National
City of event: Chateauform', France
Date of event: 29/06/2018
End date: 29/06/2018
Organising entity: Genopole Recherche / CEA
Type of entity: Public Research Body
City organizing entity: Paris, France
Arnau Montagud.

4 **Title of the work:** Towards patient-specific multi-scale models and data integration for clinical stratification
Name of the event: Severo Ochoa Research seminars
Type of event: Seminar
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: European Union
City of event: Barcelona, Catalonia, Spain
Date of event: 19/06/2018
End date: 19/06/2018
Organising entity: Centro Nacional de Supercomputación
Type of entity: R&D Centre
City organizing entity: Barcelona, Catalonia, Spain
Arnau Montagud.

5 **Title of the work:** Use of computational methods for logical modelling of biological networks
Name of the event: In Silico Systems Biology
Type of event: Course
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: European Union
City of event: Hinxton, United Kingdom
Date of event: 03/06/2018
End date: 10/06/2018
Organising entity: EMBL-EBI - Wellcome Trust
City organizing entity: Hinxton, United Kingdom
Arnau Montagud.

6 **Title of the work:** Use of computational methods for logical modelling of biological networks deregulated in diseases
Name of the event: 3rd Porto Meeting Mathematics and Biology
Type of event: Course
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: European Union
City of event: Porto, Portugal
Date of event: 20/06/2017
End date: 25/06/2017
Organising entity: Faculty of Sciences at the University of Porto, Foundation for Science and Technology and Center for Mathematics of University of Porto
Type of entity: University
City organizing entity: Porto, Portugal
Arnau Montagud.

7 **Title of the work:** Modelado y análisis de datos en Biología de Sistemas del cáncer
Name of the event: Seminarios del Instituto Universitario de Matemática Pura y Aplicada (IUMPA)
Type of event: Seminar
Corresponding author: Yes
Reasons for participation: Upon invitation
Geographical area: European Union
City of event: València, Valencian Community, Spain
Date of event: 28/03/2017
End date: 28/03/2017
Type of entity: University

Organising entity: Universidad Politécnica de Valencia
City organizing entity: València, Valencian Community, Spain
Arnau Montagud.

R&D management and participation in scientific committees

Organization of R&D activities

Title of the activity: Coorganizador del 2nd Systems biology of Transcription Regulation Workshop
Type of activity: Workshop en conferencia internacional
Geographical area: Non EU International
City of event: Lyon, France
Convening entity: 18th International Conference on Systems Biology (ICSB)
Type of entity: Associations and Groups
City convening entity: Lyon, France
Type of participation: Organiser
Nº assistants: 30
Start-End date: 27/10/2018 - 27/10/2018
Duration: 1 day

Evaluation and revision of R&D projects and articles

1 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista Bioinformatics
Entity where activity was carried out: Bioinformatics
Type of entity: Business
City of entity: Oxford, United Kingdom
Type of activity: Review of articles in scientific or technological journals
Frequency of the activity: 4
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2019

2 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista F1000 Research
Entity where activity was carried out: Faculty of 1000 Ltd
Type of entity: Business
City of entity: Londres, United Kingdom
Type of activity: Review of articles in scientific or technological journals
Frequency of the activity: 1
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2018

3 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista Frontiers in Physiology
Entity where activity was carried out: Frontiers Media SA
Type of entity: Business
City of entity: Lausanne, Switzerland
Frequency of the activity: 1

Type of activity: Review of articles in scientific or technological journals
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2018

4 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista Scientific Reports
Entity where activity was carried out: Springer Nature Limited
Type of entity: Business
City of entity: Londres, United Kingdom
Type of activity: Review of articles in scientific or technological journals
Frequency of the activity: 2
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2017

5 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista PLoS ONE
Entity where activity was carried out: Public Library of Science
Type of entity: Foundation
City of entity: San Francisco, United States of America
Type of activity: Review of articles in scientific or technological journals
Frequency of the activity: 2
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2012

6 **Name of the activity:** Revisión de artículos científicos
Performed tasks: Revisión de artículos científicos para la revista BMC Systems Biology
Entity where activity was carried out: Springer Nature Limited
Type of entity: Business
City of entity: Londres, United Kingdom
Type of activity: Review of articles in scientific or technological journals
Frequency of the activity: 1
Access system: With express recognition of the credits concerned
Geographical area: Non EU International
Start date: 2011

Other achievements

Stays in public or private R&D centres

1 **Entity:** Institut Curie **Type of entity:** Public Research Body
Start-End date: 13/01/2014 - 31/12/2019
Goals of the stay: Post-doctoral

2 **Entity:** Universidad Politécnica de Valencia **Type of entity:** University
Faculty, institute or centre: Instituto Universitario de Matemática Pura y Aplicada (IUMPA)
City of entity: València, Valencian Community, Spain
Start-End date: 27/03/2017 - 31/03/2017 **Duration:** 5 days
Goals of the stay: Guest
Provable tasks: Colaboración en investigación

3 **Entity:** EMBL Heidelberg - The European Molecular Biology Laboratory
City of entity: Heidelberg, Germany
Start-End date: 09/2010 - 02/2011 **Duration:** 5 months
Goals of the stay: Doctorate
Provable tasks: Colaboración en investigación

4 **Entity:** DENMARK TECHNICAL UNIVERSITY **Type of entity:** University
City of entity: KGS. LYNGBY, Denmark
Start-End date: 03/2010 - 09/2010 **Duration:** 7 months
Goals of the stay: Doctorate
Provable tasks: Colaboración en investigación

5 **Entity:** DENMARK TECHNICAL UNIVERSITY **Type of entity:** University
City of entity: KGS. LYNGBY, Denmark
Start-End date: 09/2008 - 01/2010 **Duration:** 4 months
Goals of the stay: Doctorate
Provable tasks: Colaboración en investigación

6 **Entity:** Uppsala Universitet **Type of entity:** University
City of entity: Uppsala, Sweden
Start-End date: 04/2007 - 06/2007 **Duration:** 3 months
Goals of the stay: Doctorate
Provable tasks: Colaboración en investigación

7 **Entity:** Centro Nacional de Supercomputación **Type of entity:** R&D Centre
Faculty, institute or centre: Life Sciences
City of entity: Barcelona, Catalonia, Spain
Start date: 01/01/2019
Goals of the stay: Post-doctoral

Obtained grants and scholarships

1 **Name of the grant:** EIT Climate-KIC, PIONEERS INTO PRACTICE - PIONEER Arnau Montagud
City awarding entity: València, Valencian Community, Spain
Aims: Post-doctoral
Awarding entity: European Institute of Innovation and Technology Climate - Knowledge and Innovation Community
Type of entity: Agencia de la Comisión Europea
Amount of the grant: 8.000 €
Conferral date: 01/04/2013
Duration: 8 months
End date: 01/01/2014
Entity where activity was carried out: Universidad Politécnica de Valencia
Faculty, institute or centre: Departamento de Matemática Aplicada

2 **Name of the grant:** Beca de formación de personal investigador de carácter predoctoral
City awarding entity: València, Valencian Community, Spain
Aims: Pre-doctoral
Awarding entity: Generalitat Valenciana
Type of entity: Gobierno de la Comunidad Valenciana
Amount of the grant: 57.600 €
Conferral date: 12/04/2007
Duration: 4 years
End date: 12/04/2011
Entity where activity was carried out: Universidad Politécnica de Valencia
Faculty, institute or centre: Departamento de Matemática Aplicada

Scientific societies and professional associations

Name of the society: International Society for Computational Biology - ISCB
City affiliation entity: Leesburg, United States of America
Start-End date: 01/01/2010 - 01/09/2019

Prizes, mentions and distinctions

1 **Description:** Premio extraordinario de tesis doctoral
Awarding entity: Universidad Politécnica de Valencia
Type of entity: University
City awarding entity: Valencia, Valencian Community, Spain
Conferral date: 29/05/2013

2 **Description:** Selected for the programme “Pioneers into Practice” from the EU-funded “Climate KIC”
Awarding entity: European Institute of Innovation and Technology Climate - Knowledge and Innovation Community
Type of entity: Agencia de la Comisión Europea
Conferral date: 15/09/2012

3 **Description:** 2nd Price in 5th Valencia IDEA competition, Energy and Environment category
Awarding entity: Valencia City Council
Type of entity: Ayuntamiento
City awarding entity: Valencia, Valencian Community, Spain

Conferral date: 28/09/2011

4 **Description:** Travel grant to attend Synthetic Biology 5.0
Awarding entity: Synthetic Biology 5.0 organisation **Type of entity:** Associations and Groups committee
Conferral date: 01/04/2011

5 **Description:** Travel grant to attend Synthetic Biology 4.0
Awarding entity: Synthetic Biology 4.0 organisation committee
Conferral date: 01/07/2008
